DETAILED ACTION

Claims 1-32 are pending in the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Kulbe et al (U.S. Pat. No. 4,689,322).

Kulbe relates to a pharmaceutical product which contains a calcium salt, as well use of the pharmaceutical product in the treatment of hyperphosphatemia, as well as for the prophylaxis of kidney stones. The invention provides a calcium mixed salt comprised of the salt of, for example, polygalacturonic acid (col. 3, lines 42-45). Cations such as calcium, iron, or other trace elements can be contained within the product in the range from 0.5 to 5 times of the stoichiometrically required amount (col. 3, lines 50-53). The method of using the calcium salts of polygalacturonic acid for controlling the phosphate level in patients is taught, comprising the step of administering a therapeutically effective amount of the salt (col. 4, lines 22-32). The resultant product can be prepared in the form of pills, dragees, capsules, gelatin capsules, or tablets (col. 13, lines 11-15). The dosage to be administered can be in the range from 2 to 30 g

daily, in conformity with the pH of the intestine section which resorbs the phosphate (Id. at lines 13-19).
